October 2002

CME Cheese and Butter Prices
Recover Somewhat

Prices for cheddar cheese on the Chicago Mercantile Exchange (CME) increased as much as 18¢ in late September and early October, before settling back slightly by mid-month.

In mid-October, CME prices for barrels and 40-pound blocks of cheddar cheese were \$1.113/4 and \$1.273/4

per pound, respectively. The barrel price had peaked at \$1.15½, its highest sustained level since May. The block price had peaked at \$1.30, its highest level since early February.

The CME butter price in mid-October was \$1.05\(^3\)/4 per pound, up nearly 13\(^c\) from its low point in September and at its highest level since early August.

Pacific Northwest Order Tentative Final Decision Issued

A tentative decision for the Pacific Northwest Marketing Area was issued on September 6 by the Secretary of Agriculture. The decision is based on the record of a public hearing held in December 2001.

The decision proposes to adopt, on an interim final and emergency basis, changes to pooling standards that have resulted in milk being inappropriately pooled on the Pacific Northwest Order.

USDA is in the process of determining whether dairy farmers approve the amended order.

For additional information about the decision contact: James R. Daugherty, Pacific Northwest Market Administrator; USDA/AMS/Dairy Programs; 1930-220th Street SE, Suite 102; Bothell, Washington 98021-8471; Telephone (425)487-6009; or by email at fmmaseattle@fmmaseattle.com.

Pool Summary

- ➤ In September, 14,614 producers delivered to the market with an average daily delivery of 3,885 pounds.
- ➤ Producer milk totaled 1.65 billion pounds, down 1.4% on a daily basis from August.
- ➤ Class I utilization totaled 340 million pounds, up 2.1% on a daily basis from August.
- Class I usage accounted for 20.6% of producer milk.
- The September Producer Price Differential is \$0.54 per cwt.
- The Statistical Uniform Price is \$10.46 per cwt., up 26¢ from August, but \$5.82 below September 2001.
- ➤ Market statistics for September are shown on Pages 4 and 5.

September 2002 Producer Milk by Class

	Percent	Product Pounds	Price
			\$/cwt.

Class IV	1.1	17,841,774	10.22
Total		1,650,666,302	

Per Capita Disposition of Fluid Milk Products

n examination of per capita disposition of fluid milk products (FMP) in the Upper Midwest Marketing Area was conducted for 2001, with comparisons made to 2000. In addition, the Upper Midwest data were compared to similar data for all other Federal orders and California, combined

Comparison to Other Orders

In 2001, total per capita disposition of FMP in the Upper Midwest market exceeded the average for all other Federal orders and California, as represented in Figure 1. In addition, a much smaller proportion of disposition is in whole milk products in the Upper Midwest Order when compared to all other Federal Orders and California. These findings are consistent with trends that have been observed in the Upper Midwest region in previous years.

Total per capita disposition of FMP in the Upper Midwest Order averaged 223 pounds in 2001, down from 225 pounds in 2000. In both years, 18% of the total was disposed of as whole milk products and 82% as lowfat products. This compares to an average for 2001 of 190 pounds per capita for all other Federal orders and California combined, down from 194 pounds in 2000. In 2001, the whole milk portion accounted for 37% of total disposition, while lowfat accounted for 63%.

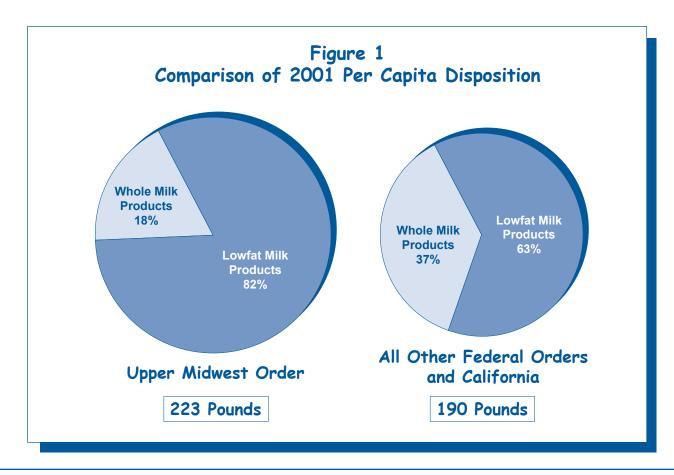

Upper Midwest Order Trends

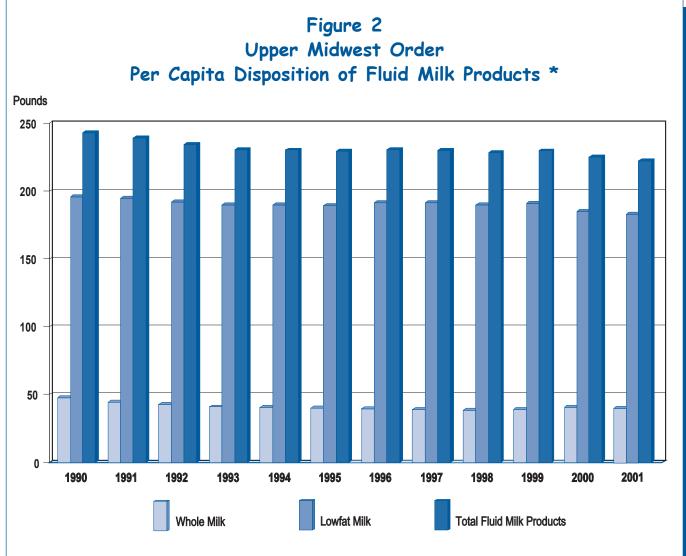

The Upper Midwest Order (F.O. 30) was formed on January 1, 2000 by the merger of the former Chicago Regional Order (F.O. 30) and the former Upper Midwest Order (F.O. 68). In Figure 2 on Page 3, data for 1990 through 1999 are estimated by combining the data for the two predecessor orders.

Several changes in per capita disposition of FMP in the Upper Midwest market have taken place between 1990 and 2001

Total FMP disposition dropped from 241 pounds in 1990 to 223 pounds in 2001, but most of that decline occurred by 1993. In addition, changes in the proportion of whole milk products versus lowfat milk products occurred during the period.

Per capita disposition of whole milk products declined from 47 pounds in 1990 to 40 pounds in 2001. During this time, disposition of lowfat products also declined, dropping from 194 pounds in 1990 to 183 pounds in 2001. As a result, whole milk products accounted for a smaller proportion of total disposition in 2001 than they did in 1990. In 2001, whole milk products accounted for 18% of the total, down from 20% in 1990.

^{*} The Upper Midwest Order (F.O. 30) was formed on January 1, 2000 by the merger of the former Chicago Regional Order (F.O. 30) and the former Upper Midwest Order (F.O. 68). In this graph, data for 1990 through 1999 are estimated by combining data for the former Chicago Regional and Upper Midwest Orders.
