# Annual Utilization and Classification

Annual utilization and classification for 2001 and 2002 are summarized and compared in the table on Page 2. The annual numbers represent the sum of monthly data.

**Class I Utilization** - Class I producer milk in 2002 was 4.1 billion pounds, up 3% from 2001. The increase resulted primarily from a rise in total Class I packaged disposition and a decline in Class I receipts from other order plants. Class I use includes milk sold to consumers in fluid form.

Total Class I packaged disposition (sales) increased nearly 1% during 2002. Decreases in disposition of flavored milk and reduced fat milk were more than offset by increases in disposition of milk, lowfat milk, fat free milk, and flavored reduced fat and flavored fat free milk.

Most packaged sales of milk, however, continue to be reduced fat milk, accounting for 37% of total packaged sales, followed by fat free milk at 24%, whole milk at 16% and lowfat milk at 13%.

Class I use in 2002 accounted for 20.2% of total producer milk (as shown in Figure 1), up from 19.8% in 2001.

**Class II Utilization** - Class II producer milk in 2002 was down 134 million pounds, or 20%, from 2001. Class II

use primarily includes fluid cream products, ice cream, cottage cheese and yogurt. Class II producer milk accounted for 2.6% of total producer milk during the year.

**Class III Utilization** - Class III producer milk of 15.4 billion pounds in 2002 was up 1% from 2001. Class III utilization primarily includes milk used for the manufacture of hard cheeses, and accounted for 75.8% of producer milk.

**Class IV Utilization** - Class IV utilization in 2002 totaled 0.3 billion pounds, up 13% from 2001. Class IV includes butter and all dried milk products, and accounted for 1.4% of total producer milk in 2002.

**Producer Milk** - Total producer milk in 2002 was up 244 million pounds, or 1.2%, from 2001.

During the year, 860 million pounds of producer milk was pooled on the Upper Midwest Order from California, down 1.9 billion pounds from 2001. In addition, 1.2 billion pounds of milk was pooled from

Idaho during the year, up 560 million pounds from 2001.

An average of 14,310 producers delivered to the market each month in 2002, down from 14,585 in 2001. Average component levels of producer milk for the year were:

- Butterfat - 3.73%
- Protein - 3.02%
- Other solids - 5.71%
- Nonfat solids - 8.72%
