USDA Announces Three Final Rules

Upper Midwest Final Rule

An order amending the order regulating the handling of milk in the Upper Midwest Marketing Area was signed October 25, 2006 by Lloyd C. Day, Administrator, Agricultural Marketing Service. The document was published in the *Federal Register* on October 30, 2006. **The amended order will become effective December 1, 2006.**

This order adopts the proposed rule (final decision), published in the *Federal Register* on September 13, 2006 concerning pooling provisions of the Upper Midwest Marketing Area. Specifically, this final rule adopts provisions that:

- 1) Establish a limit on the volume of milk a handler may pool during the months of April through February to 125% of the volume of milk pooled in the prior month;
- 2) Establish a limit on the volume of milk a handler may pool during the month of March to 135% of the volume of milk pooled in the prior month; and

- 3) Allow the market administrator to increase the administrative assessment up to a maximum of 8 cents per hundred-weight on all pooled milk, if necessary, to maintain the required fund reserves.

The order amending the order is based on the record of a public hearing held at Bloomington, Minnesota in August 2004. Other order changes resulting from that same hearing were adopted at an earlier date.

More than the required number of producers for the Upper Midwest marketing area approved the issuance of the final order amendments.

A paper copy of the order amending the order can be obtained by calling Harold Ferguson toll-free at: (888) 301-8224, extension 231. An electronic version is available at: www.fmms30.com.

Pool Summary

- In October, 17,019 producers delivered to the market with an average daily delivery of 4,532 pounds.
- Producer milk totaled 2.4 billion pounds, up 456 million pounds from September, and 274 million pounds above October 2005.
- Class I utilization totaled 397 million pounds, down 1.6% on a daily basis

from September. Class I usage accounted for 16.6% of producer milk.

- The October Producer Price Differential (PPD) is \$0.24 per cwt.
- The Statistical Uniform Price is \$12.56 per cwt., up \$0.19 from September, but \$2.03 below October 2005.
- Market statistics for October are shown on Pages 4 and 5.

Class III Milk Prices--January 1990 to October 2006

Class III milk prices under the Federal milk order system since 1990 are shown in the table below. The prices are also shown graphically for the last four years.

Class III is primarily milk used to make hard cheese, and is often referred to as the manufacturing milk price. (Class III milk also included butter until 2000.)

After averaging more than \$14 in 2005, the Class III price has averaged below \$12 so far in 2006, with a low of \$10.83 in May and a high of \$13.39 in January.

Final Rule to Amend Mideast Milk Order

The U.S. Department of Agriculture recently announced a final rule that permanently adopts amendments to the pooling provisions of the Mideast milk marketing order.

These amendments were previously discussed in a recommended decision. This rule is based on testimony and evidence given at a public hearing held in Wooster, Ohio in March 2005.

The permanently adopted amendments:

- 1) Establish a limit on the volume of milk a handler may pool during the months of April through February to

115 percent of the volume of milk pooled in the prior month; and

- 2) Establish a limit on the volume of milk a handler may pool during the month of March to 120 percent of the volume of milk pooled in the prior month.

These amendments will assist in identifying the milk of those producers who regularly and consistently service the fluid needs of the market and subsequently have all their milk pooled and priced under the order.

A majority of producers that pool on the Mideast order approved these amend-

ments which will become effective December 1, 2006. The final rule was published in the *Federal Register* on October 30.

Final Rule to Amend Central Milk Order

The U. S. Department of Agriculture recently announced a final rule to permanently adopt amendments to the pooling provisions of the Central Milk Marketing Order. This decision is based on testimony and evidence given at a public hearing held at Kansas City, Missouri in December 2004.

Specifically, the adopted amendments:

- 1) Increase supply plant performance standards;
- 2) Amend features of the "touch base" provision;
- 3) Amend certain features of the "split plant provision"; and

- 4) Decrease the diversion limit standards of the order.

The final rule also adopts a proposal that limits the volume of milk a handler can pool in a month to 125 percent of the total volume of milk pooled in the previous month.

These amendments will assist in identifying the milk of those producers who regularly and consistently service the fluid needs of the market and subsequently have all of their milk pooled and priced under the order.

More than the required number of producers for the Central marketing order

approved the final order amendments which will become effective December 1, 2006. The final rule appeared in the October 30 *Federal Register*.
