## USDA Issues Final Decision to Amend the Producer-Handler Definitions of All Orders

A final decision was recently issued by the U.S. Department of Agriculture which proposes that the producer-handler definitions of all Federal milk marketing orders be amended to limit exemption from pooling and pricing provisions to those with total route disposition and sales of packaged fluid milk products to other plants of 3 million pounds or less per month. The exempt plant definition will continue to limit route disposition and sales of packaged fluid milk products to other plants to 150,000 pounds or less per month. The final decision is subject to producer approval by referendum.

# Recap of Federal Order Data for 2009

The table to the right and the map below summarize data for all Federal milk orders for 2009. Some comparisons are also made to data for 2008.

Producer milk in 2009 for all Federal orders combined totaled 123.4 billion pounds, up from 115.9 billion in 2008. Class I producer milk for all Federal orders totaled 45.3 billion pounds, or 36.7% of producer milk. Total Class I pounds for all Federal orders in 2009 increased by about 0.6% from the previous year. Class I use in 2009 ranged from 13.7% in the Upper Midwest Order to 85.7% in the Florida Order.

The weighted average uniform price for all Federal orders combined for 2009 was \$12.44 per cwt., down from \$18.24 in 2008. The average uniform price in 2009 ranged from \$11.59 in the Upper Midwest Order to \$16.15 in the Florida Order.

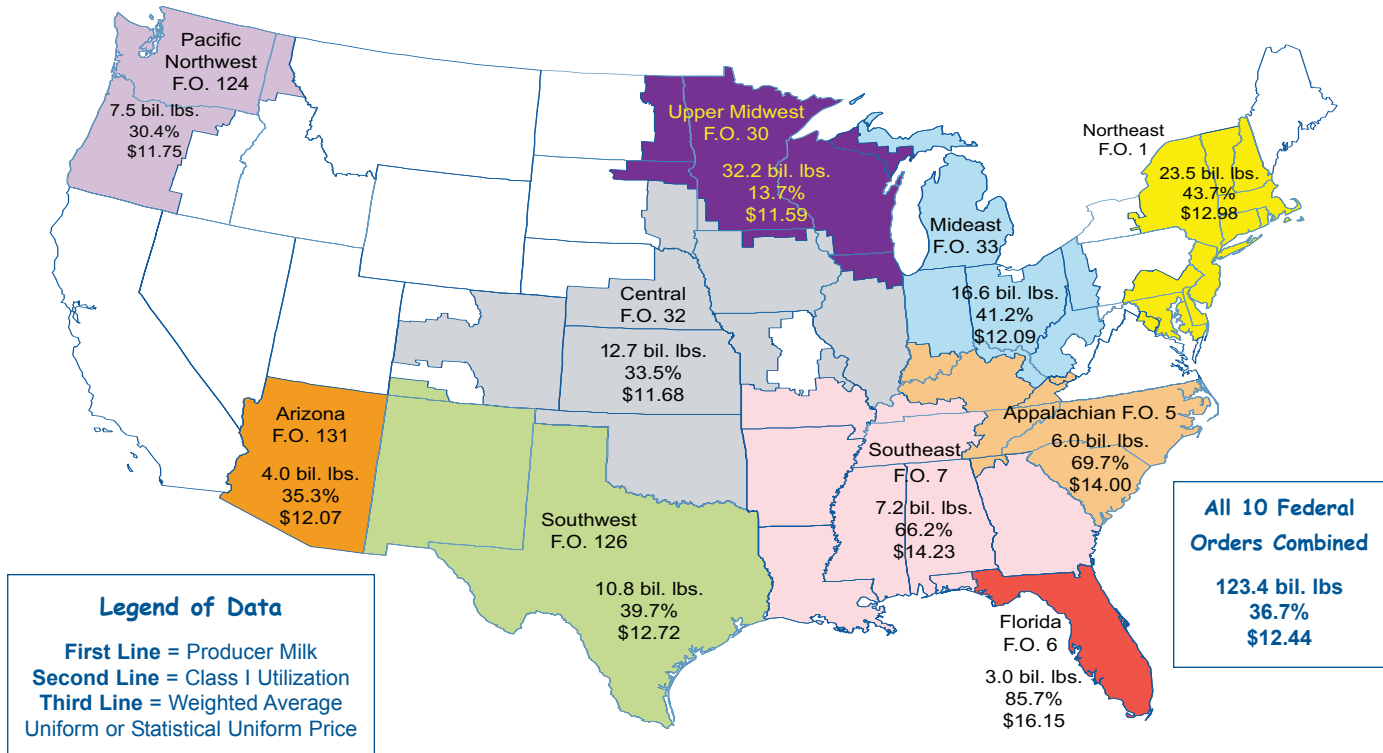

It should be noted that Federal order prices are *minimums* and do not necessarily represent what producers are actually paid. Upper Midwest producers, for example, sometimes receive premiums considerably above the Federal order minimums.
