Mideast: Request for Additional Proposals

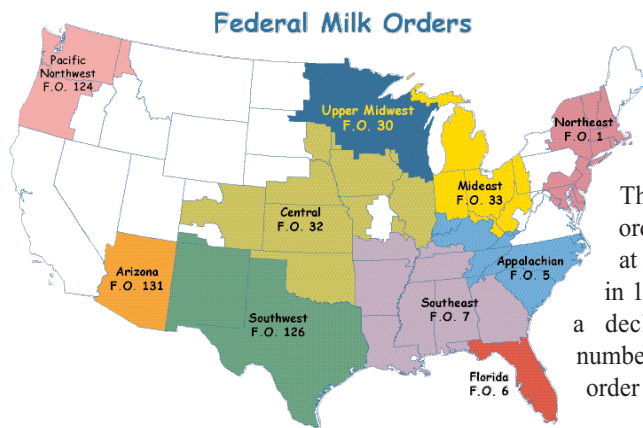

USDA has received a request to hold a public hearing to consider a proposal to amend the definition of the pool distributing plant provision in the Mideast Milk Marketing Order. The proposal, available at www.ams.usda.gov/dairy, would amend the pooling standards as part of the definition of a pool distributing plant.

Before deciding whether a hearing will be held, USDA is providing the opportunity for interested

parties to submit additional proposals, which preferably should be electronically submitted via email to amsdairycomments@usda.gov.

Proposals can also be faxed to (202) 690-0552 or mailed to: Deputy Administrator, USDA/AMS/Dairy Programs, STOP-0231-Room 2971, 1400 Independence Ave., SW, Washington, DC 20250-0225. **Proposals must be received by August 12, 2011.**

Measures of Growth in Federal Orders

The table on Page 2 shows significant changes in selected measures of growth in Federal milk orders since 1947. The number of Federal orders began the period at 29, rapidly rising to 83 in 1962, before beginning a decline to the current number of 10 mainly due to order mergers.

As would be expected, the

population of Federal orders increased during the 63-year period, while the number of handlers and producers generally declined.

Receipts of producer milk, also as expected, generally rose during the period. In 2010, producer milk of nearly 127 billion pounds was more than eight times as much as in 1947.

As a result of the decline in the number of producers and rise in producer milk, daily deliveries of milk per producer rose sharply during the period. The sharp rise in producer milk resulted in a corresponding decline in the percentage of producer milk used in Class I.

Pool Summary

- In June, producer milk totaled 2.8 billion pounds, down 116 million pounds from May and 108 million pounds below June 2010.
- Class I utilization totaled 322 million pounds, down 3.1% from May on a daily basis. Class I usage accounted for 11.6% of producer milk.
- Class III utilization totaled 2.4 billion pounds and accounted for 86.2% of producer milk.
- The June Producer Price Differential (PPD) was \$0.47 per cwt.
- The Statistical Uniform Price was \$19.58 per cwt., up \$2.32 from May and \$5.44 above June 2010.
- Market statistics for June are shown on Pages 4 and 5.

* Source: *Dairy Market Statistics-2010 Annual Summary*, AMS, USDA.

^{1/} End of year. The number of markets peaked at 83 in 1962. The number of handlers peaked at 2,314 in 1961.

^{2/} Average for year. The number of producers peaked at 192,947 in 1961.

^{3/} Beginning in 1989, due to disadvantageous price situations in some markets, handlers elected not to pool milk that normally would have been associated with the order. This has reduced, sometimes substantially, the volume of producer milk receipts reported for some markets.

Class III Milk Prices--January 2000 to June 2011

Class III milk prices under the Federal milk order system since 2000 are shown in the table below. The prices are also shown graphically for the last five years, along with an 11-year average for 2000-2010. Class III is primarily milk used to make hard cheese, and is often referred to as the manufacturing grade milk price.

The June 2011 Class III price was \$19.11, up \$5.49 from June 2010, and \$5.36 above the 11-year average for the same month for 2000-2010.

For January through June 2011, the Class III price averaged \$17.06. Based on current estimates of the Class III price for the last six months of the year

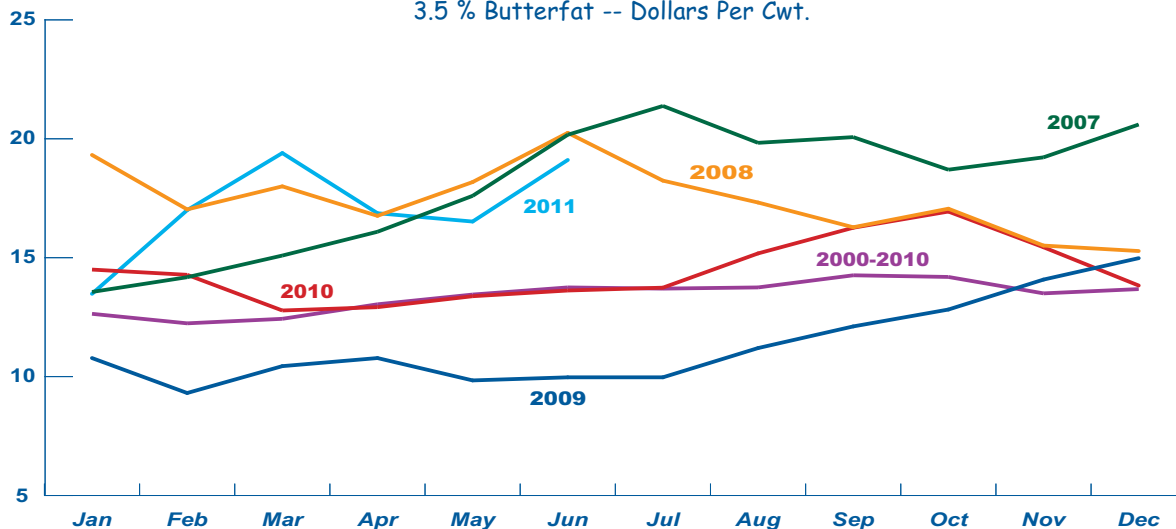

at about \$19.30, the simple average Class III price for 2011 will be about \$18.20, surpassing the record high of \$18.04 set in 2007. In addition, the estimated 2011 Class III price will be \$3.79 above 2010, and \$4.81 above the 11-year average for 2000-2010.
